

# ClearVue™

Prone Position Breast Radiotherapy System

ORBITAL THERAPY

# THE USE OF PRONE POSITION TO TREAT BREAST CANCER IS QUICKLY GAINING POPULARITY.

Prone position increases the separation of the target and critical organs and minimizes target motion caused by breathing. This results in the ability to deliver a smaller dose to the surrounding organs such as lung and heart, and more precise dose to the intended target.

Orbital Therapy's carbon fiber ClearVue™ prone position table was designed to address current and future requirements to deliver this emerging therapy technique. As many studies are starting to point to accelerated and partial breast treatments, precise patient positioning and open access to the breast are becoming of greater importance.

ClearVue™ offers a number of advantages over other commercially available prone position tables. Our unique, open design provides visual and treatment access to the breast allowing to plan and treat from multiple angles\*.

The interchangeable mid-section allows you to quickly adjust the table configuration between inserts. The same inserts are used for right and left breast, and are designed to reduce the CT straight-line artifact that can be seen with other products\*. The optional laser alignment system provides an additional point of reference directly on the breast to allow for triangulation of the treatment site\*. ClearVue™ is compatible with all CT scanners and treatment machines.

Artifact Reducing Inserts

Laser Alignment System

## KEY BENEFITS

### Physician & Physicist

- Unique, full open under-table access allowing to plan and treat from multiple angles.
- Variety of inserts to provide flexibility in selecting the treatment technique.
- Optimized for whole or partial breast treatment and simulation.
- Prone position creates separation of breast from lung and heart, and minimizes target motion.
- Compatible with CT scanners.
- Designed to work with vacuum locking technologies for patient fixation

### Patient

- Ergonomic cushion profile designed to equally distribute the weight and minimize pressure around the breast opening.
- Variable inserts to increase patient comfort.
- Minimize unwanted dose to critical organs such as heart and lungs.

### Therapist

- Lightweight one-piece carbon fiber table
- Open access for easy setup.
- Slip-resistant feet allow direct placement of ClearVue™ on top of the existing treatment couch or option to lock down the table using crossbars.
- Horizontal and vertical indexing for table and patient alignment.
- Indexed handlebars to assist in daily reproducibility.
- Carbon fiber allows to treat through table.
- Laser alignment system for precise daily reproducibility

## SPECIFICATIONS

TABLE MATERIAL	CARBON FIBER
CUSHION MATERIAL	URETHANE/SYNTHETIC VINYL/RUBBER COATING

## TABLE DIMENSIONS (EXCLUDING CUSHION)

LENGTH	77 INCHES (196 CM)
BASE LAYER	18 INCHES (46 CM)
TOP LAYER MAXIMUM WIDTH	23 INCHES (58 CM)

## HEIGHT OPTIONS

DIFFERENT SIZES TO ACCOMMODATE VARIOUS CT SCANNERS. OVERALL HEIGHT OF CARBON STRUCTURE.

CLEARVUE™ OT 2-1000-20	20 CM
CLEARVUE™ OT 2-1000-17	17.5 CM
CLEARVUE™ OT 2-1000-15	15 CM

## WEIGHT

APPROX. 28 LBS (12.7 KG) WITH ACCESSORIES

## REGULATORY STATUS

510(K) CLEARED, CE

## INSERT OPTIONS & DIMENSIONS
